

(b)S

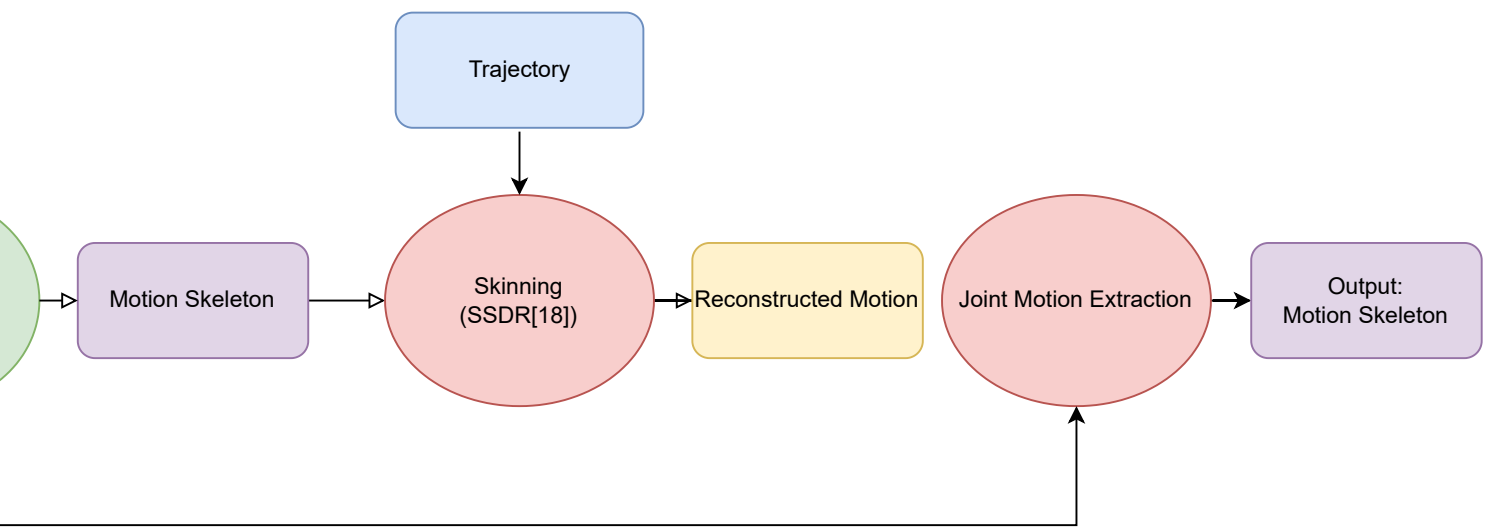

(c) Input/Output for each step of pipeline

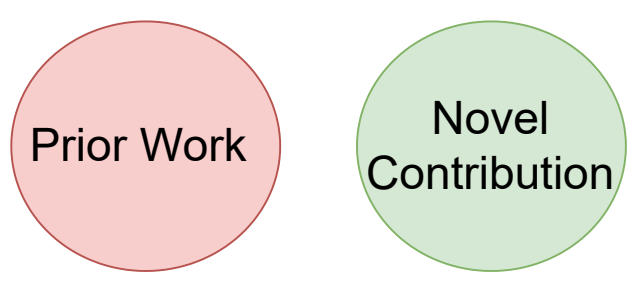

The flow charts for(a) the overall pipeline of Transfer4D and (b) the novel skeletonization procedure. Prior work, I have mentioned the method used and its citation in the paper. If it is not mentioned assu

(a) Pipeline

Skeletonization

(d) Intermediary steps in the pipeline

(c) & (d) represent the different what different components in the flow chart represent. For (c) assume it to be trivial. For novel contribution, I have mentioned the particular equation
